

Sustainable Supply Chain Management Policy

Tata Housing is committed to develop houses which are environment friendly and shall ensure that all activities carried out for development of houses will have minimal impact on environment and shall contribute to the sustainable development.

We shall focus on following guidelines while conducting the business through:

- Encourage suppliers, vendors, contractors, transporters and services providers to ensure total compliance to applicable legal and other requirements which have significant impact of health, safety and environment
- Procurement of locally available/produced/manufactured materials to minimize environmental impact
- Procurement of materials which have high recycled contents than the virgin materials
- Procurement of alternative materials than virgin materials
- Procurement of the materials from the less polluting and less energy intensive sources, manufacturing and technologies
- Procurement of materials which are less carbon emitting and manufactured through clean/green technologies
- Procurement of the materials which are less water intensive during its manufacturing and use phase
- Prefer vendors who collect and recycle the waste from our project sites
